**Built in
reporting function**

**22 Room booking
pads installed**

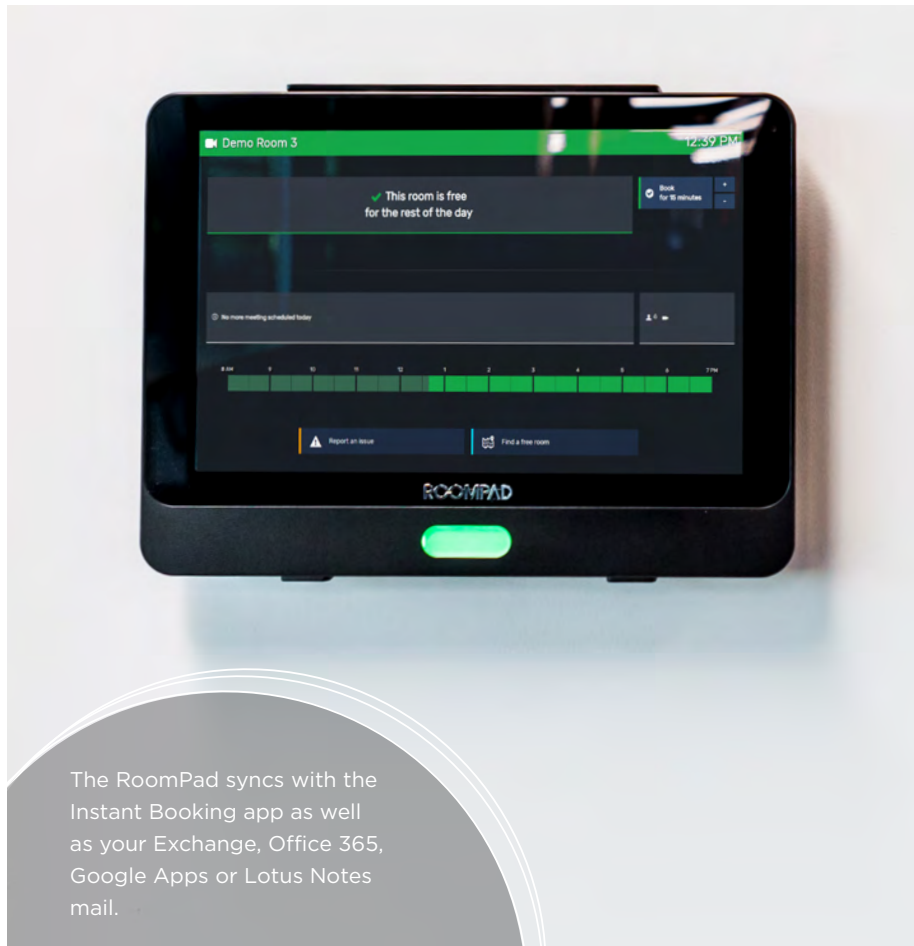

**Fully accessible
management system**

IMPROVING OFFICE PRODUCTIVITY AND EFFICIENCY

Global advertising agency, IRIS Worldwide came to Aura to source, install and integrate workspace technology including desk and room booking management. IRIS Worldwide is a thriving micro network of over 1,000 people in 14 locations across the globe.

Due to its growing success, IRIS was looking to relocate its UK office to a bigger location, with more space. Along with the new move, IRIS wanted to install a room booking management system to manage the facilitation of their new meeting rooms.

The RoomPad syncs with the Instant Booking app as well as your Exchange, Office 365, Google Apps or Lotus Notes mail.

Aura provided IRIS with a meeting room management system enabling them to improve room resources, whilst presenting real time availability of workspaces to their employees.

With its built in reporting function available, IRIS have been able to cater to its staff meeting room requests through a manageable system accessed by all and analyse meeting room usage to enable appropriate utilisation.
